SUMMARY

Motivated and personable Front-End Developer with a strong foundation in full-stack development, specializing in HTML, CSS, JavaScript, and Ruby on Rails. Known for excellent organizational skills, efficiency, and accountability, with a persistent, goal-oriented mindset. Skilled in problem-solving, collaboration, and communication, with additional experience in Vue.js, GitHub, and graphic design. Passionate about creating efficient, user-friendly applications and continuously expanding technical expertise.

DEVELOPMENT EXPERIENCE

Database Developer and Web Designer | Ralla Klepak Performing Arts Program January 2023 - October 2023

- Designed and developed a custom user-management system using Ruby on Rails and JavaScript, transforming an inefficient paper-based workflow into a streamlined digital solution.
- Served as primary maintainer for the customer-facing website using JavaScript, HTML, CSS, and Wix, managing multimedia assets and producing monthly newsletters.
- Supervised a team of three in designing and fabricating set pieces, while maintaining accurate inventory tracking for the Art Department.

IT Technician | Hebrew Theological College

July 2023 - October 2023

- Aided professors and students at the women's division of the Hebrew Theological College with setting up student portals and school computers. Was in charge of updating and maintaining technology in the building and ensuring the network was up and running at all times.
-

WEB DEVELOPMENT PROJECTS

Brainstorm - Journaling Web App

- Developed a dynamic web application using Ruby on Rails and Vue.js to help users organize their thoughts and engage in unstructured journaling and notetaking.
- [Frontend Repo](#) / [Backend Repo](#)

Promptly - Creative Writing Tool

- Built a web app using Ruby on Rails, Vue.js, Ruby, JavaScript, and HTML, to enable authors to generate customized writing prompts and overcome writer's block.
-
